## **AMENDMENTS TO THE CLAIMS**

This listing of the claims replaces all prior listings and versions:

- 1-23. (canceled).
- 24. (currently amended) A plant host cell or transgenic plant comprising
- (i) a polynucleotide encoding a zinc finger polypeptide comprising at least two zinc fingers, each zinc finger comprising a binding motif comprising the amino acid sequence shown in SEQ ID NO: 22; and
  - (ii) a target DNA sequence in a plant gene,

wherein at least one binding motif has been engineered to bind to the target DNA sequence.

- 25. (canceled)
- 26. (canceled)
- 27. (previously presented) The plant host cell or transgenic plant of claim 24 wherein the amino acid residue at position 1 of SEQ ID NO:22 is E, K, T, S, Q, V, A or P, the amino acid residue at position 23 of SEQ ID NO:22 is T or I, the amino acid residue at position 12 of SEQ ID NO:22 is S or T, there are two amino acids at positions 3-6 of SEQ ID NO:22, with the first of which being S, E, K, T, P, or R, and the second amino acid being E, and wherein the two zinc finger proteins are linked by the sequence shown in SEQ ID NO: 23 or SEQ ID NO: 24, and the amino acid residue at position 21 of SEQ ID NO:22 is Arg or Lys, and the amino acid residues at positions 14, 18 and 21 of SEQ ID NO:22 are hydrophobic amino acids and not Phe, Trp or Tyr.
- 28. (previously presented) The plant host cell or transgenic plant of claim <u>24</u> wherein one or more the zinc fingers binds to a target DNA triplet in accordance with the following:
- (a) if the 5' base in the triplet is G, then position 19 of SEQ ID NO:22 of the first zinc finger is Arg or position 15 of SEQ ID NO:22 of the second zinc finger is Asp or position 19 of

USSN: 09/732,348 Atty. Dkt. No.: 8325-2012

Client Dkt. No.: G12-US1

SEQ ID NO:22 of the first zinc finger is Arg and position 19 of SEQ ID NO:22 of the first zinc finger is Asp;

- (b) if the 5' base in the triplet is A, then position 19 of SEQ ID NO:22 of the first zinc finger is Gln or Glu and position 15 of SEQ ID NO:22 of the second zinc finger is not Asp;
- (c) if the 5' base in the triplet is T, then position 19 of SEQ ID NO:22 of the first zinc finger in is Ser or Thr and position 15 of SEQ ID NO:22 of the second zinc finger is Asp or position 19 of SEQ ID NO:22 of the first zinc finger is a hydrophobic amino acid other than Ala;
- (d) if the 5' base in the triplet is C, then position 19 of SEQ ID NO:22 of the first zinc finger in may be any amino acid, provided that position 15 of SEQ ID NO:22 of the second zinc finger is not Asp;
  - (e) if the central base in the triplet is G, then position 16 of SEQ ID NO:22 is His;
  - (f) if the central base in the triplet is A, then position 16 of SEQ ID NO:22 is Asn;
- (g) if the central base in the triplet is T, then position 16 of SEQ ID NO:22 is Ala, Ser, Ile, Leu, Thr or Val provided that if it is Ala, then one of the residues at position 19 of SEQ ID NO:22 is a small residue;
- (h) if the central base in the triplet is 5-meC, then position 16 of SEQ ID NO:22 is Ala, Ser, Ile, Leu, Thr or Val provided that if it is Ala, then one of the residues at position 13 or position 19 of SEQ ID NO:22 is a small residue;
  - (i) if the 3' base in the triplet is G, then position 13 is Arg;
- (j) if the 3' base in the triplet is A, then position 13 is Gln and position 15 of SEQ ID NO:22 is Ala;
- (k) if the 3' base in the triplet is T, then position 13 is Asn or position 13 is Gln and position 15 of SEQ ID NO:22 is Ser;
- (l) if the 3' base in the triplet is C, then position 13 is Asp and position 14 of SEQ ID NO:22 is Arg; and,

when the central residue of a target triplet is C, the use of Asp at position 16 of SEQ ID NO:22 allows preferential binding to C over 5-meC.

USSN: 09/732,348

Atty. Dkt. No.: 8325-2012

Client Dkt. No.: G12-US1

29. (previously presented) The plant host cell or transgenic plant of claim 24 wherein

there is an N-terminal zinc finger having a leader peptide as shown in SEQ ID NO: 27 added

thereto.

30. (withdrawn) The plant host cell or transgenic plant of claim 24 wherein one or more

of the zinc fingers of the polypeptide comprises a mutated model zinc finger domain.

31. (withdrawn) The plant host cell or transgenic plant of claim 30 wherein the model

zinc finger domain is a zinc finger from a protein selected the group consisting of Zif268, GLI,

Tramtrack, or YY1.

32. (previously presented) The plant host cell or transgenic plant of claim 24, wherein

the zinc finger polypeptide has more than three zinc fingers.

33. (previously presented) The plant host cell or transgenic plant of claim 32 wherein

the zinc finger polypeptide has four, five, six, seven, eight or nine zinc fingers.

34. (canceled)

35. (previously presented) The plant host cell or transgenic plant of claim 24, wherein

the target DNA sequence is operably linked to a coding sequence.

36. (previously presented) The plant host cell or transgenic plant of claim 35, wherein

transcription of the coding sequence is regulated by binding of the zinc finger polypeptide to the

target DNA sequence.

37. (previously presented) The plant host cell or transgenic plant of claim 24, wherein

the target DNA sequence is part of an endogenous sequence.

Atty. Dkt. No.: 8325-2012 Client Dkt. No.: G12-US1

38. (previously presented) The plant host cell or transgenic plant of claim 35, wherein the target DNA sequence and the coding sequence are heterologous to the cell.

39. (previously presented) The plant host cell or transgenic plant of claim 24, wherein the zinc finger polypeptide is fused to a transcriptional activator domain.

40. (canceled)

41. (previously presented) The plant host cell or transgenic plant of claim 39 wherein the transcriptional activator domain comprises a VP16 transcriptional activator domain.

**42.** (previously presented) The plant host cell or transgenic plant of claim 39 wherein the transcriptional activator domain comprises a VP64 transcriptional activator domain.

43. (withdrawn) The plant host cell or transgenic plant of claim 24, wherein the zinc finger polypeptide is fused to a transcriptional repressor domain.

44-47. (canceled)

48. (previously presented) The plant host cell of claim 24, wherein the zinc finger polypeptide is fused to a catalytic domain of a restriction enzyme.

49. (previously presented) The plant host cell or transgenic plant of claim 24 which is a transgenic plant.

**50.** (previously presented) The plant host cell or transgenic plant of claim 24 which is a plant host cell.

51 to 70. (canceled).

USSN: 09/732,348 Atty. Dkt. No.: 8325-2012

Client Dkt. No.: G12-US1

71. (previously presented) The plant host cell or transgenic plant of claim 24, wherein the second Cys residue is replaced by His.
